FURNITURE LEATHER PLAIN

Hides Contain About 50 Square Feet

Hand Buffed (colors, Olive and Maroon only, in stock)	per square foot	\$0.32½
No. 1 Machine Buffed (all staple and fancy colors)	per square foot	.25
Essex M. B. (colors, Olive, Maroon and Black, in stock)	per square foot	.20
Special M. B. (colors, Olive and Maroon, in stock)	per square foot	.18
Split (color, Olive only in stock)	per square foot	.13

Our Hand Buffed and No. 1 leathers are of the very best selected stock, especially desirable for tufted work.

Our Essex leather meets the demand for a quality at moderate price that is suitable for both tufting and plain work.

Special M. B. and Split leathers are more adapted for plain work and chair seatings. These qualities not suitable for fine tufted work.

Full hide is smallest quantity we furnish.

SPANISH AND ANTIQUE EFFECTS

Grain, Spanish, best quality; colors, Antique Oak, Red and Green	per square foot	\$0.35
H. B. Spanish, colors, Antique Oak, Red and Green	per square foot	.28

In Special M. B. Leather color 77½ (Dark olive) is the only color we carry in stock.

In Spanish Leather, we carry all the standard colors, i.e., Oak, Brown, Red and Green.

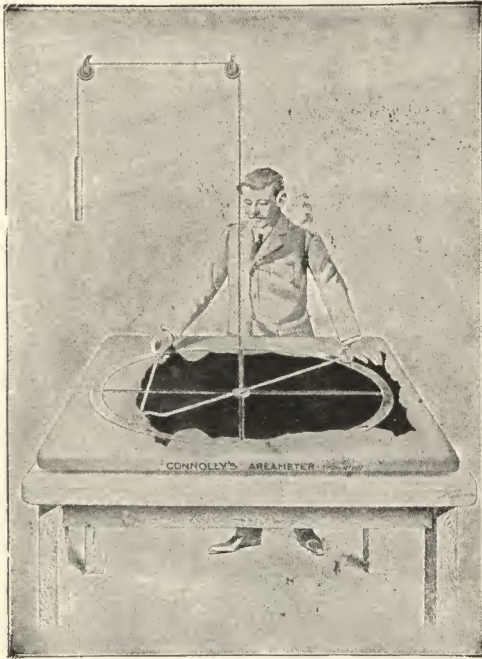

On account of the many inquiries from our customers for leather cut to chair seat sizes, we have added this line to our stock in both plain and Spanish effects. Made up from our best grade of Special M. B. leather. The trade will find this line of great convenience in reseating chairs. Also very economical, as it often saves purchasing a whole hide, when only a few seats are required.

Prices on larger sized pieces quoted upon application.

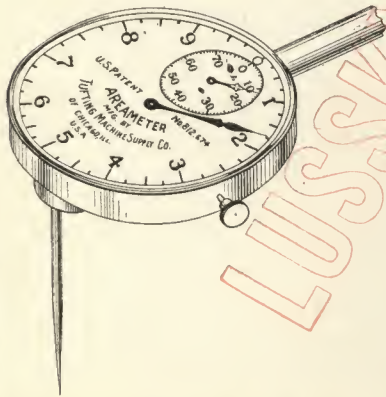

THE AREAMETER

Leather Measuring Machine

Patented in the United States, Canada and European Countries

This illustration shows the method of measuring a small Hide with a No. 4 Areameter. The operator passes the pointer around outer edges—the indicator does the rest—anyone can do it.

Enlarged illustration of indicator from which readings are taken. By pressing button, both hands are reduced to zero. Actual diameter of dial is $2\frac{1}{2}$ inches

The Areameter is a necessity wherever an accurate measurement of patterns, hides or other materials of irregular outline is required.

Each machine is thoroughly tested by the maker and guaranteed by us.

It is a watch dog in your establishment.

It can neither cheat nor be cheated.

It is absolutely accurate, having been accepted by the British and German Governments. The Department of Commerce and labor, Bureau of Standards, at Washington, D. C., after various tests of every description confirms its accuracy to within .03 sq. ft. on any area.

It is out of the way when not in use.

It requires no power and no extra room.

It is so cheap (as compared with the price of other machines) it will pay for itself many times over, even to the smallest user.

Hides with holes in them are as accurately measured as perfect hides.

PRICE

No. 5—For measuring any size area up to 80 square feet, inclusive, of hardwood box, lifting device, circular disc and testing Sheets. \$125 .00

No. 6—For measuring any size area up to 40 square feet (kips and sides in particular). Same equipment as

No. 5. 125.00

HAIR PICKERS

The "Champion."

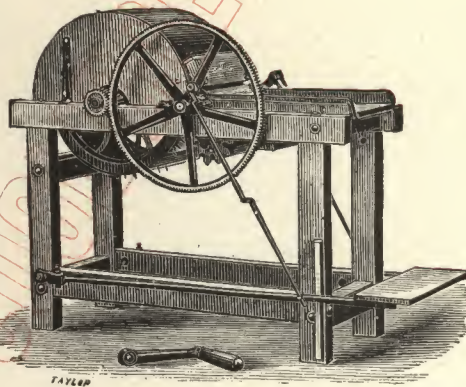

No. 1. Hand Power

Within the past fifteen years the **Champion Hair Picker** has acquired a reputation which, in the estimation of those **who have used other machines**, places it far in advance of any and all Hair Pickers now manufactured.

This has been accomplished by continual effort toward improvement, as well in the working capacity as in durability and finish of the machine, until now it is as nearly perfect as possible.

The addition of strong **Iron Plates** on the wooden cylinder, holds the teeth more firmly and renders it impossible to loosen them by any ordinary usage. This is a special feature of the **Champion Hair Picker**.

The Lags are bolted to iron flange wheels (instead of being simply nailed on to a wooden head as in other machines), thereby contributing additional strength and security to the cylinder.

No. 2. Foot Power

The Handle by which the machine is operated, is placed on the side opposite the gearing, thereby protecting the operator from accident from the revolving wheels. In addition to this precaution, a small iron guard covers the gearing, thus obviating any danger of accident in that direction.

The Journal Boxes are lined with Babbitt metal, and are arranged to compensate for wear.

The Frame is of hardwood, securely put together with joint bolts.

It is the strongest, most durable, and lightest running machine manufactured.

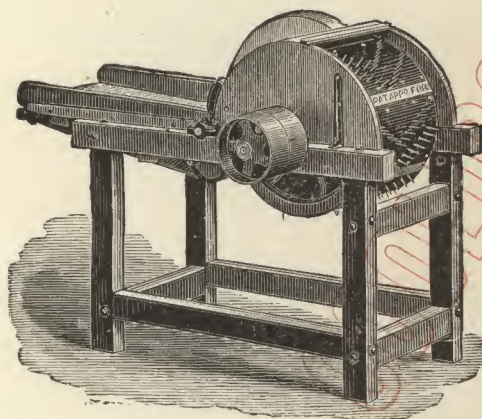

It operates equally well upon all kinds of bedding and upholstering materials, and will pay for itself in one season.

The Champion Hair Picker is now in general use in every one of the United States, and in Canada Mexico and South America.

No. 1—Hand power.....	each	\$30.00
No. 2—Foot power.	each	40.00
No. 9—Hand power. Like No. 1, but with 700 teeth.....	each	37.50

HAIR PICKERS

Extra Size Power Picker

No. 3. Steam Power

We are now selling an extra size Picker especially arranged for belt power. (See cut.) They are very strongly built, with steel shafts, endless feed belts and loose and tight pulleys, $3\frac{1}{2} \times 8$ inches, which will make 600 revolutions per minute with safety.

The gearing is housed (as shown in cut) which prevents possibility of accident.

These power machines are already in use by the largest railroad car shops and furniture manufacturers in the country, and are very highly endorsed and recommended.

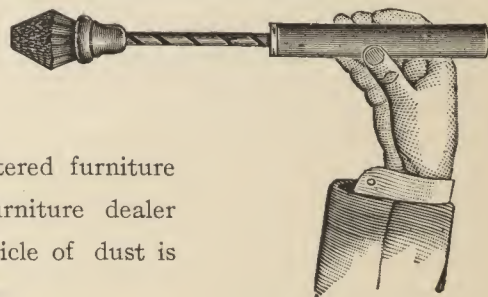

They are of especial interest and value to **Car Builders, Upholsterers, Mattress Makers, Carriage Manufacturers**, and other consumers of Curled Hair, Moss, Tow, Cotton, African Fibre and other bedding and upholstering materials.

No. 3—Power Picker.....each \$65.00

	Sized back, prepared burlaps and canvases, cut lengths	35%

DIRECTIONS FOR HANGING BURLAPS

After the walls are prepared, give them a coat of good glue size.

Use only strong flour paste, which should be fresh. This should be warmed up a little and a tablespoonful of Venetian Turpentine added; stir the whole well, that it may be thoroughly incorporated.

Examine the edges of the Burlaps and if their clean cut has been damaged in transit, retrim them carefully.

To make sure that the seams will not open, see that the edges are well pasted and when in position, carefully rolled down.

As these goods have been shrunk in manufacture, they must not be stretched on the walls but pressed up to a close joint.

FURNITURE CORDS

We carry a complete stock of all Standard and Fancy Colorings to match the furniture coverings now used.

BUTTON MACHINES

Ideal No. 2—Hand Power

Ideal No. 2

The Ideal No. 2 Button Machine is the acme of perfection in hand power button covering machines, contains many new and valuable features not heretofore found in button covering machines. Has double cam movement, making it a most powerful machine. Has revolving automatic dies which facilitate rapid operation in turning out the finished button.

Ideal No. 2. Complete for 22 ligne button.....each \$15.00

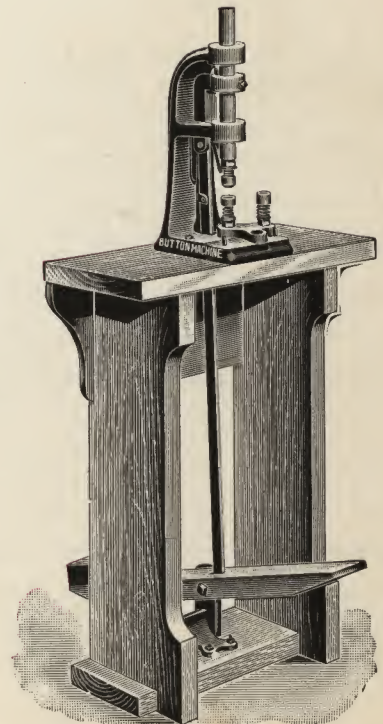

Reliable Foot Power

We consider the Reliable Foot Power Machine the best foot power machine in the market. All parts are strongly made. Has oscillating dies which makes it a speedy machine in operation. Dies have automatic control, which insures perfect alignment at all times. Machine is mounted on a heavy substantial stand.

The Reliable is now in use in many of the large upholstering shops where the work demands a high class machine.

Exact Sizes of Buttons

NOTE.—In designating the size of buttons the term "ligne" means 1-40 of an inch. For instance, a 20-ligne button measures 20-40 of an inch in diameter, or $\frac{1}{2}$ -inch; 22-ligne 22-40 of an inch, and so on.

CLINCH TUFTING BUTTONS

Neider Clinch

Neider Clinch, showing Washer

Wire, Two-Prong

"Neider" Two Prong.

The Neider Two-prong Clinch Button is one of the most practical of labor-saving devices. By its use the old method of sewing buttons with twine is done away with. No twine to break. Buttons do not pull out. Tufts are uniform.

Neider, 1¼ inch, velour covered.....	per gross, \$0.25

SUPERIOR

Portable Knockdown Seat Back

The Superior Portable Knockdown Seat Back is exactly what its name implies. It is superior to any seat back. It has a flexible canvas back and is put up in such a way that all possible comfort can be derived. A glance at the illustration will show its compactness.

When folded it is only 16 inches long and 2 inches in diameter. Can be carried in any suit case or with gun or rod case. Can be put up, ready for use, or knocked down and folded, in five seconds. Weighs only $1\frac{1}{2}$ pounds.

Can be attached to seat of boat, wagon, benches or bleachers. Convenient to carry. Pack it in your grip or suit case. Nicely finished in black enamel, with durable canvas back.

CHAIR SEATS

The "Kearsage" Tufted Seat

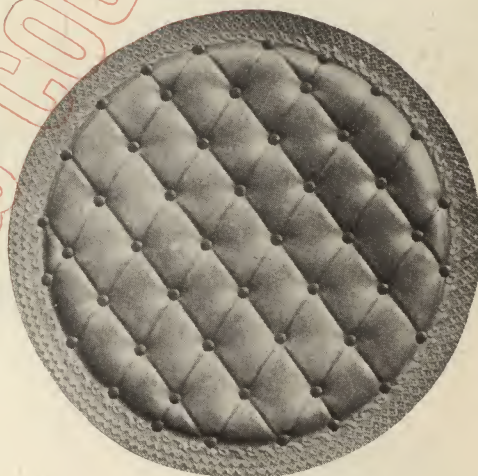

The "Kearsage" Seat is upholstered with our celebrated Kearsage brand of artificial leather, and the construction and workmanship in this seat is of the highest order. In appearance it is difficult to distinguish it from the real leather upholstered seat, and the "Kearsage" has all of the enduring qualities of higher-priced goods. At the very moderate price we offer this article no dealer can afford to be without it. For reseating and new work the "Kearsage" Seat is much more sightly than cane, and costs less.

Kearsage Seats are tufted with rust-proof double clinch nails, which are guaranteed not to pull out.

Kearsage Seats are padded with best grade of Hair Felt.

No. 190. Diner

No. 200. Round

We carry Kearsage Seats in color, Black only

A sample of Kearsage Artificial Leather from which this seat is made will be mailed you upon request.

CHAIR SEATS

The "Busse" Patent Adjustable Upholstered Seats

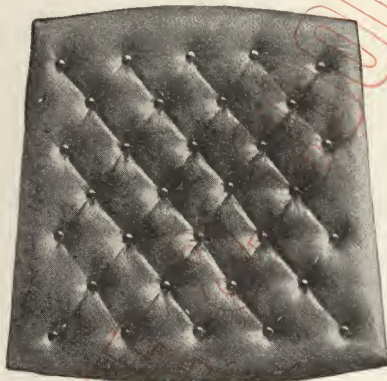

These seats are made in all the sizes necessary to fit any cane or cobbler seated rocker, office or dining chair. They are ready to adjust to any chair. No cutting or trimming. Don't even have to use a nail. Anyone can put them into place without the use of tools in a few minutes.

The Busse seats are upholstered with the best quality of Morocco grained leatherette, filled with a soft elastic fibre and mounted upon a foundation of 3-ply veneer, to which are attached FOUR WROUGHT STEEL HOOKS, the device by which the seats are fastened to the chair frame

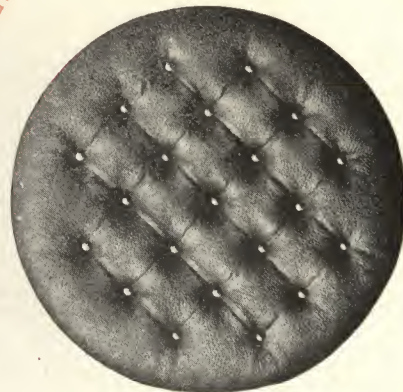

They are handsome, comfortable seats, rich in appearance, and the cost is less than re-caning.

Yankee Doodle Sulky.....	per dozen	18.00

TIREING MACHINE

Cut No. 1

Cut No. 2

For a long time furniture dealers and repair men have felt the need of a machine with which they could apply rubber tires to baby carriages, go-carts, Irish mails, velocipedes, tricycles and etc., without wasting material. This can be accomplished only by using the Little Giant Tireing Machine, which is shown in the accompanying cuts.

Cut No. 2 shows wire twisted and ready to be cut off. They are put on much tighter with The Little Giant Tireing Machine than is possible in any other manner.

It does not require a mechanic to operate the machine, and after a little experience, one man can put a full set on in fifteen minutes, no matter how small the wheels may be.

The profits are large in this class of repair work, and it will be readily seen what an advantage it would be to be equipped with the Little Giant Tireing Machine.

The Little Giant Tireing Machine.....	each	\$3.00
Rubber tire $\frac{1}{2}$ inch diameter, $\frac{1}{8}$ -inch hole, $12\frac{3}{8}$ lbs. per 100 feet.....	per lb.	.35

FOLDING CARD OR CLUB TABLES

Table No. 3

Felt Top

Top, 32x26½ inches; height 26 inches.

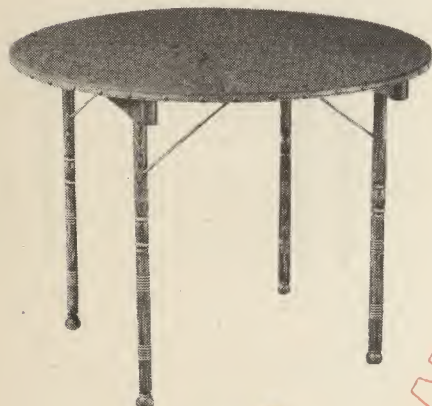

Table No. 7

Felt Top

Top, 34 inches; height, 26 inches.

Table No. 4

Polished Top

Top, 32x26½ inches; height, 26 inches.

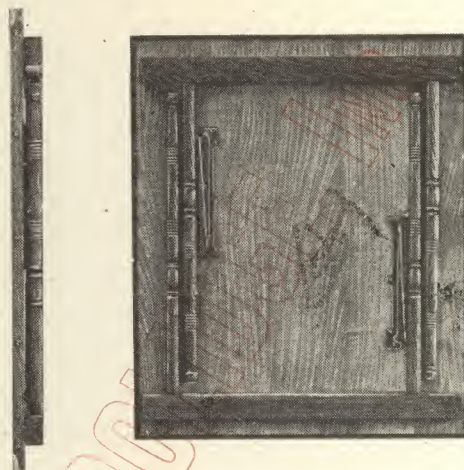

Illustration of the under side of the table shows the legs folded, and gives a good idea of the construction of the table, and in what a compact form the table can be folded. It is only two inches in thickness.

No. 3 table is made of oak, covered with green felt, decorated with nickel corners. The cross-piece or cleat on end of table keeps the top from warping and is so arranged that a person can sit close to the table without cramping the knees. The felt used on this table is of extra thickness and made special. It is much better than padded tables where cotton batting is used and inferior quality of felt. The American Whist Congress use this table exclusively.

No. 7 table is of same construction as No. 3, except top is round; the edge being finished with binding fastened by enameled nails, all legs being braced.

No. 4 table. Top is selected ash, finished golden oak.

Framework is hardwood, finished golden oak.

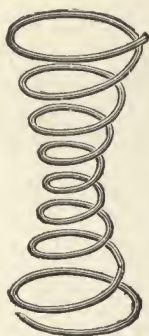

The braces on all above tables are heavy steel bars, coppered, and slide in steel grooves

SPRING CLIPS

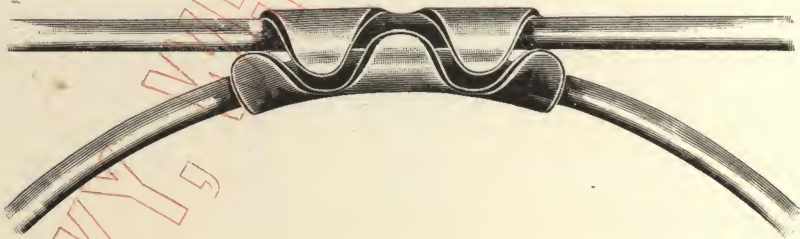

The S. & H. Spring Edge Clip

S. & H. Steel Clip

Pliers for Closing Clip

Showing Application in Locking Spring to Edge Wire

ADVANTAGES

This Clip can be applied at the rate of from fifteen to twenty per minute as soon as the operator becomes reasonably expert. It makes a positive attachment between the parts which will never give way. It is a talking point in selling the work. Labor considered, it costs no more than twine and tying. It is a clean, mechanical construction which at once appeals to the purchaser.

S. & H. Spring Edge Clips (about 95 clips to the pound)	per pound	\$0.15

The "King" Clip

Showing Application in Locking Springs

Plyers

Showing Application in Locking Spring to Edge Wire

This Clip, for fastening two springs together, or one spring to an edge wire or straight wire, is superior to any ever put on the market, as it is impossible for it to get loose or out of place, on account of being locked at both ends when in use — which is of great importance, and a feature that other clips do not have. We also wish to call your attention to the number of above clips in a pound, which is 140, as some other makes run as low as 95 to a pound, and none over 135. Another valuable point in connection with this clip is that when it is fastened it acts like a hinge, and will allow movement of springs without pulling them out of shape. As these clips are so simple in construction, they can easily be applied, at a rapid rate, and, with the "plyers" we furnish, there is no trouble putting them on so they will stay in place, and never work loose and need tightening up afterward. These Clips will cost no more than others that run from 20 to 40 per cent less to a pound.

ROCKER SPRINGS

Harrington

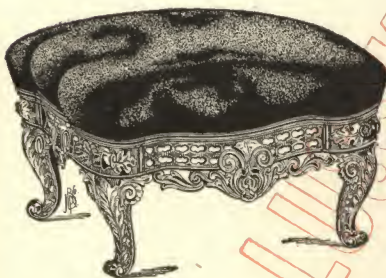

Our improvement on the Harrington Rocker Spring (Patented Dec. 2, 1902) consists of a steel plate which enables the spring to be adjusted, either forward or backward, after having been attached to a chair body, and without removing the board from the body. If the rocker is not properly adjusted, if it does not balance properly, it is but a few moments' work to obtain the proper result.

Price does not include the base on which the spring is mounted, but does include the board used to attach the spring to the rocker body and the bolts to attach spring to the base.

CARPET AND OIL CLOTH STRETCHERS

No. 30

Anderson's Eclipse was invented by a practical carpet layer, and is the only perfect device in the market for stretching oil cloth, linoleum, mattings and all other floor coverings. It matters not whether the work is on cement, mosiac or polished wood floors, whether using pins and sockets, or tacking up to base. Especially adapted for fitting around hearths, bay windows, corners and in laying stair carpet. Very valuable for carpet laying in large work, such as theatres, hotels and club houses. Every carpet layer should have this device.

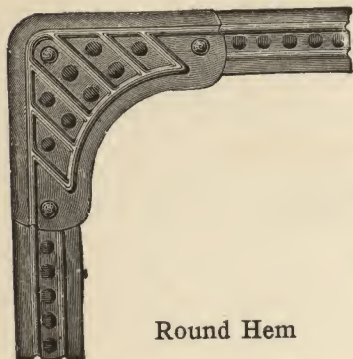

No. 30. Anderson's Eclipse Stretcher.....each \$3.60

 No. 300. Rosewood Handle, Osborne's..... per dozen 3.94

CARPET AND RUG BEATER

The Wonder

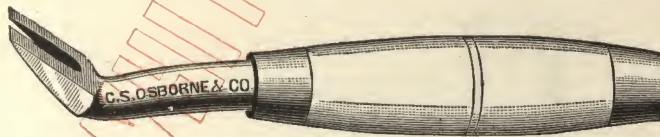

Patented April 21, 1903

The Wonder Carpet Beater is made of two coppered steel wires of suitable length twisted together at their middle portions and bent to form loops making practically two beaters in one, as the illustration shows. This is unquestionably the best carpet and rug beater ever produced. Very light, supple and durable.

No. 4. Wonder Beater; length 30 inches, spread 7 inches..... per dozen \$1.20

TACK CLAW OR PULLER

"The Boss"

Half Size, No. 123½

The "Boss" Tack Puller is a substantial heavy tack claw. Well made and very serviceable. A tool that every upholsterer and carpet layer should have.

No. 123½. Osborne "Boss" Tack Claw..... per dozen \$6.75

RIPPING TOOL

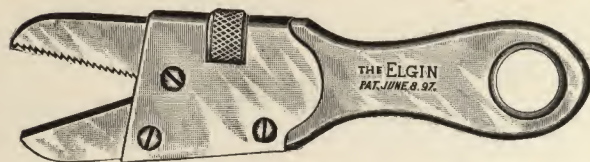

No. 80

No. 80. Ripping Tool, hand forged, 8¼ inches long over all..... per dozen \$3.60

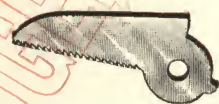

WRENCHES

Elgin Adjustable

Steel. Nickel-plated and Hardened

No. 4. 7-inch

Jaw. No. 4 1/2

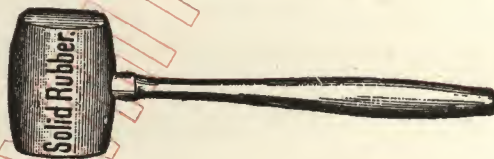

The Elgin Wrench gets into corners, angles and cramped places where other adjustable wrenches cannot go. By adjusting it to fit the article, there are no ends to interfere, and you get the full leverage of the wrench.

It does anything any wrench will do, within its range. There is comparatively no strain on the pivot screw, the working strain coming on the screw post, and the milled recess back of the under jaw.

An ordinary alligator wrench must be thrown away when its teeth are worn out. The Elgin is good for years by renewing its jaw occasionally.

No. 4. 7-inch, nickel-plated, adjustable, weight 10 ounces.	per dozen	\$9.00
No. 4 1/2. Extra jaws, nickel-plated.	per dozen	3.00

RUBBER Mallet

For use in furniture and wood working factories. Practically indestructible. Does not deface the wood, the elasticity of the rubber taking up the force of the blow.

No. 1. Weight 1 1/8 pounds; size, 3x2 1/4 inches (hickory handles).....	per dozen	\$ 8.10
No. 2. Weight 1 5/8 pounds; size, 4x2 3/8 inches (hickory handles).....	per dozen	10.80
No. 3. Weight 2 1/2 pounds; size, 4 7/8x2 1/4 inches (hickory handles).....	per dozen	14.58

FILLER

San-Itai-Rie Crack and Crevice Filler

For manufacturers of furniture, pianos, organs, office and store fixtures, and all wood workers; for filling open joints, cracks, worm holes, dents, broken corners, slivered and rough places, and, in fact, all **defects in woodwork**. It dries like the wood in a few hours. Made in colors to match all kinds of wood, and has a very woody appearance. Can be successfully used in supplying missing parts of ornamental or carved work. Can be sawed, whittled or carved to any desired shape. Ornaments can be made from San-Itai-Rie Crack and Crevice Filler and glued on same as wooden ornaments. Defective parts of expensive lumber that have been considered useless can often be used to good advantage with a treatment of San-Itai-Rie Crack and Crevice Filler.

Advantages of San-Itai-Rie Crack and Crevice Filler.

Will not shrink in drying. Stays up level with the surface. Fills any openings in woodwork no matter how large. Can be stained, shellacked, varnished or polished in few hours after filling in is done. Takes stain, shellac, varnish or polish, same as woodwork. Can be sandpapered or scraped down to a surface. Is not a greasy or oily substance and will not stain or spot the wood. It is not expensive, is very light and bulky. A pound goes a long way.

This powder and liquid combined forms a filler that hardens like the wood.

HAND SCREWS

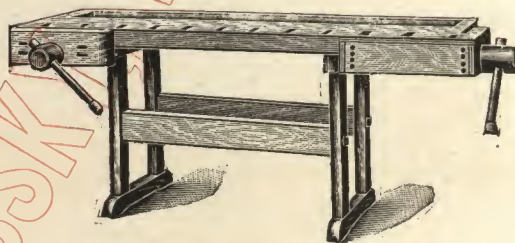

Jorgensen's Patent Adjustable Hand Screws

A single clamp will adjust to any one of these positions or any modification of them. It is nearly twice as fast as any other clamp made, its steel spindles being equipped with a right and left hand thread. Its jaws can be adjusted to any angle, thus doing away with the necessity of squaring up irregular surfaces. One jaw can be made to overlap the other, forming a position very often desirable. It has tighter grip than any other clamp. Glue will not adhere to the spindle causing the thread to strip. Its parts are not liable to become separated. Spindles and sockets are steel and jaws are maple.

DOWEL FASTENER

Hieronymus.

Description.

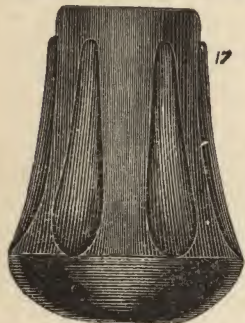

Place the fastener as in No. 1, drive it down as in No. 2, drive it into mortise as in No. 3. Chair factories and repair shops are using them in large quantities. Not intended for pine, bass or other soft woods, common sense will suggest where they can be used. Critical joints, such as front posts in rockers and office chairs, are made double strength by applying two fasteners to the joint.

Patented September 10, 1895.
